

# Do Medical Librarians Need a Specialist Degree Programme?

Prof. Dr. Rudolf Mumenthaler, HTW Chur

Medical Librarians Matter for Evidence Based  
Medicine

Berne, September 9 2016

## Questions to be answered in this talk

- Do medical librarians need a specialist degree programme?
- Or: Do medical librarians need a specialist training programme?
  - And if yes: what kind of a training programme?
- Which new skills are important to medical librarians?
- What kind of training and educational programmes exist already?
- What should we do in the field of training programmes for medical librarians?

Slides are online:

<http://www.slideshare.net/ruedi.mumenthaler/do-medical-librarians-need-a-specialist-degree-programme>

# Horizon Report Library Edition 2015: Challenges

## Challenges Impeding Technology Adoption in Academic and Research Libraries

Solvable Challenges: Those that we understand and know how to solve

- > **Embedding Academic and Research Libraries in the Curriculum**
- > **Improving Digital Literacy**

Difficult Challenges: Those that we understand but for which solutions are elusive

- > **Competition from Alternative Avenues of Discovery**
- > **Rethinking the Roles and Skills of Librarians**

Wicked Challenges: Those that are complex to even define, much less address

- > **Embracing the Need for Radical Change**
- > **Managing Knowledge Obsolescence**

# New skills and roles of (medical) librarians

## New skills: understanding and supporting research

- „[...] contemporary librarians should be able to understand the needs of the research community as well as to select and make easily accessible the resources that support their work. Anyone fulfilling this role must seamlessly traverse the physical, conceptual, and digital realms.“

Jean Ferguson, head of research and reference services at Duke University Library <http://www.dukechronicle.com/articles/2013/06/13/role-librarians-changes-digital-age#.VafGCcZViko>

- This is a general trend in academic libraries – what about medical libraries?

# Horizon Report Library Edition 2015: Challenges

## Challenges Impeding Technology Adoption in Academic and Research Libraries

Solvable Challenges: Those that we understand and know how to solve

- **> Embedding Academic and Research Libraries in the Curriculum**
- **> Improving Digital Literacy**

Difficult Challenges: Those that we understand but for which solutions are elusive

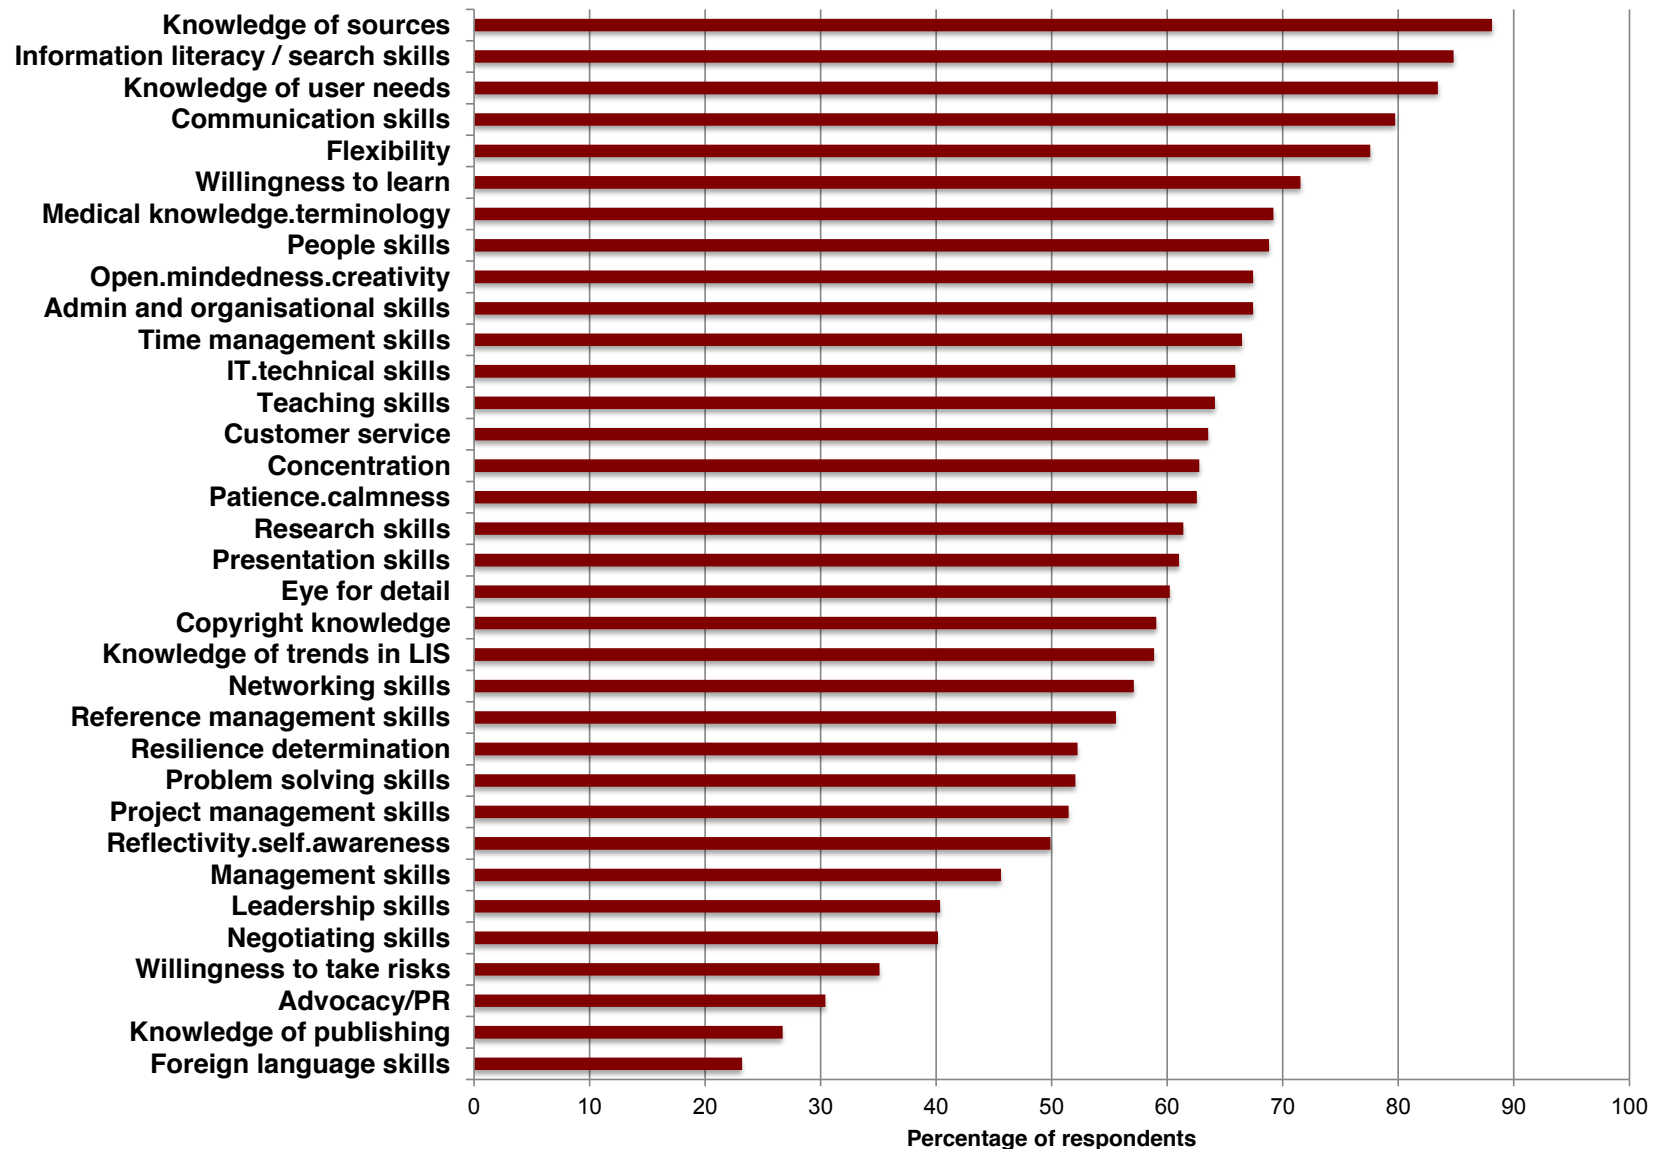

- **> Competition from Alternative Avenues of Discovery**
- **> Rethinking the Roles and Skills of Librarians**

Wicked Challenges: Those that are complex to even define, much less address

- **> Embracing the Need for Radical Change**
- **> Managing Knowledge Obsolescence**

- all Challenges have a direct impact on the roles and skills of librarians

# Survey: Skills Identified

## Educational landscape

- Switzerland as an example (in reality it's much more complicate...)
- Library and Information Science is taught at the Universities of Applied Sciences in Chur (german) and Geneva (french)
  - On the levels of a Bachelor degree (180 ECTS) and with a consecutive Master of Science programme (in Chur Master in Business Administration with focus on Data Science)
- in german speaking countries only at Humboldt University in Berlin there is also a doctorate programme, usually LIS is also taught at University of Applied sciences
- There are several programmes for a Master of Advanced Studies in Library and Information Science
  - (HTW Chur, University of Zurich, Universities of Bern/Lausanne, HEG Genève)
  - Usually 60 ECTS, degree as a Master of Arts

# Master programmes in Germany

- similar situation in Germany:
- Programmes for MAS LIS
  - at Humboldt University
    - Blended learning
  - Hochschule Hannover
    - Distant learning course
  - Hochschule für Technik Köln
    - Blended learning
- several consecutive Master programmes (MSc)
  
- The combination of a Bachelor/Master in any field/topic with an additional MAS in LIS ist the usual way for an academic librarian or reference librarian in an academic library

## Further education

- there are many different possibilities and formats:
  - summer schools (HTW Chur/HEG Genève), 1 week
    - (for example on Digitisation or Research Data Management)
  - seminars (1 or 2 days) offered by universities or library associations (BIS)
- courses and seminars on generic topics
  - Human resource management, project management, didactics, copyright, general management, IT topics...
- Conclusion: there are many possibilities for further education in generic skills, general topics and in Library and Information Science, but none (or few) for specific skills in medical libraries.
- There is a demand for smaller modules on specific topics, also in general LIS
  - i.e. one week with a certificate (3 ECTS), that can be combined to a CAS or MAS

## Course formats

- Distance learning, online-only
  - Independent from place/country and time
  - Self motivation important, no classes, few social contacts and exchange
  - Tools: webinars, online seminars, hang-outs
- Blended learning (combination of online courses and real classroom
  - Flipped classroom (online modules with videos in advance, discussion in the classroom)
- Face to face-courses
  - Teaching in classes
  - i.e. for hands-on workshops (national, local)
- Exchange program
- MOOC
  - Online courses for free; certificate from a university

## Needs and Requirements

- What do medical librarians need?
  - What kind of further education, special training do they need?
  - On which topics?
  - In what kind of formats?
- 
- In order to get answers we want to make a survey
  - And we collected some ideas on a virtual discussion board

# Input from our Discussion Board

Hello! Welcome to our discussion about the education of medical librarians. This noticeboard has been set up to allow colleagues to submit their thoughts and ideas to our panel discussion in Bern on Sep. 9th, 2016 (<http://samw.ch/de/Aktuell/Agenda.htm>). Please just jot down your thoughts on a post-it. Feel free to open up new clusters of notes. We'll project the noticeboard during our panel discussion and refer to it! Many thanks for your efforts! Gerhard (gerhard.bissels@ub.unibe.ch)

P.S. It would help if you marked your stickies with your name and email address so we could

Please mark your contributions with your name, and leave your email address on the grey sticky list on the right!

Contributors' contact details:  
 Gerhard Bissels, Bern (gerhard.bissels@ub.unibe.ch)  
 Helge Knüttel, Regensburg (helge.knuettel@unibe.ch)  
 Kate Kelly (katekelly@rcsi.ie)  
 Tiina Heino, Helsinki (tiina.m.heino@helsinki.fi)  
 Katri Larmo, Helsinki (katri.larmo@helsinki.fi)  
 Abimbola Alayo, London (abombolo@yahoo.com)  
 Inga Znotina, Riga (Inga.Znotina@rsu.lv) Education of Med  
 Teresa Lee, Lyon (leet@iarc.fr)  
 Gerdien de Jonge, Rotterdam (g.dejonge@erasmusmc.nl)  
 María García Puente Sanchez, Madrid (mariagps@gmail.com)  
 Anne Madden, Dublin (anne.madden@ucd.ie)  
 Mary Dunne, member of HSLG, Ireland, mdunne@hrb.ie

**Areas of Knowledge to be taught** [Content]

- Expanding the role of librarians to contribute to global efforts to improve the accuracy and transparency of biomedical research and reduce waste in research
- Importance of good health research reporting practices & the consequences of poor biomedical research reporting. What are reporting guidelines and how to find and use them. How librarians can raise awareness of reporting guidelines and implement their use within the research studies being conducted by clinicians/researchers within their organisation. Shona Kirtley (shona.kirtley@erms.ac.uk)
- Teaching (e)health literacy skills including patient education. anne.madden@ucd.ie
- Health and healthcare systems – awareness of impact. anne.madden@ucd.ie
- Peer reviewing skills. anne.madden@ucd.ie
- How to write learning objectives and match them to medical competencies & EBM process (Suzanne Maranda, marandas@queensu.ca)
- How to present statistics to our patrons, so they can understand the use of our resources. mariagps@gmail.com
- Medical librarians in medical schools [Audience]
- Hospital librarians [Audience]
- Researchers (systematic reviews) [Audience]
- Continuing education for trained librarians now working in a medical setting (Helge) [Audience]
- Search Strategies for Clinical Practice

**Target Audience** [Audience]

- Medical librarians in medical schools [Audience]
- Hospital librarians [Audience]
- Researchers (systematic reviews) [Audience]
- Continuing education for trained librarians now working in a medical setting (Helge) [Audience]

**Course Format** [Format]

- On-line only (Gerhard) [Format]
- Some modules as block-courses – in English or several national languages, in various locations, in various locations (Gerhard) [Format]
- Blended learning: combination of online courses and input ("flipped classroom") with sessions in the real classroom (more discussions)
- face to face courses or blended learning (online theory and practical work face to face) Inga.Znotina@rsu.lv (Latvia)

**Content Areas:**

- Searching for systematic reviews (Gerhard) [Content]
- Searching for rapid reviews (Gerhard) [Content]
- Research data management (in medical science)
- Evidence-based medicine (Inga.Znotina@rsu.lv)
- Critical appraisal (Inga.Znotina@rsu.lv)
- Managing references (focus on an SR workflow: large amounts of references from various data sources, distributed teamwork environment, distributed fulltext access, support of critical appraisal) (Helge)
- SR software tools and workflows (Helge Knüttel, Regensburg, helge.knuettel@unibe.ch) [Content]
- management of health libraries/hospital libraries katekelly@rcsi.ie [Content]
- Scientific/scholarly publishing practices and processes & trends in including open access, open science, open data katekelly@rcsi.ie [Content]
- Consumer health information services/sources; health literacy katekelly@rcsi.ie [Content]
- Systematic searching anne.madden@ucd.ie [Content]
- Reading & understanding medical literature anne.madden@ucd.ie [Content]
- Knowledge of core resources in health sciences disciplines; katekelly@rcsi.ie [Content]
- Space planning and learning environments katekelly@rcsi.ie [Content]
- 'Out of the box thinking' – how to see our possibilities in
- marketingo skills

[http://linoit.com/users/Gerhard\\_from\\_Bern/canvases/Education%20of%20Medical%20Librarians](http://linoit.com/users/Gerhard_from_Bern/canvases/Education%20of%20Medical%20Librarians)

## Skills & topics

Specific skills for a special training program

Existing programmes at LIS schools

External courses, training on the job

### **EBM-related Library Services/specific skills**

Literature search supporting evidence based practice

Critical Appraisal

Systematic Literature Searching

Teaching EBM literature search

Health Research Reporting

Basic epidemiology (study designs, epidemiological measures)

Information for patients

Trends in MLIS, keeping up-to-date

Core resources in health science (databases, e-resources)

### **LIS skills**

Information literacy (teaching of)

User research/customer service

Collection Development, licensing

Databases and e-resources

Library Management

Information services development

Research data management, repositories

Classification and cataloging

Reference Management (tools and methods)

### **generic skills**

Knowledge and information management

Ethics, Confidentiality, Online Security

Scientific/scholarly publishing practices and processes & trends

Pedagogics and educational technologies/pedagogical skills

Sustainability

Marketing and Communication

statistics and visualisation

## Which topics are missing?

- you may contribute to our spreadsheet (during the next days)

<https://docs.google.com/spreadsheets/d/1i3N7HKoIPYL7koU7daVSKJ5Y8kpNwLhy8ROnZrTiCwl/edit#gid=0>

## Requirements and needs (some theses)

- There are enough possibilities for an education (or further education) as an academic librarian in general (MAS LIS, MSc)
  - but there is no specific training/education for medical librarians
- for universities the market for these specific topics in one country is too small (maybe not in Germany...)
- medical librarians want and need special training for important new skills
- (medical) librarians need possibilities for specific modules depending on the requirements of their job
- Librarians prefer a modular system with smaller modules (1 week, 2-3 ECTS) that can be combined to a CAS or a MAS
- Librarians want a blended learning programme combining distant learning with face-to-face teaching and discussing

## Planned Survey

- These theses (and other questions) will be studied with a survey among medical librarians
- We aim to better understand the needs of the community
- On this basis we will try to set up a programme
  - Maybe international or european
  - Maybe a blended learning or a distant learning MAS in Medical Librarianship
  - Maybe coordinated with existing MAS LIS programmes (for general topics in LIS)
  - Maybe in English only, maybe with parts in different languages (for example meetings in real world and discussions in national languages)
- The survey will take place in September/October 2016
- The results will be published in EAHIL Journal 4/2016
